**BURBANK-GLENDALE-PASADENA AIRPORT AUTHORITY
LAUNCHES NEW WEBSITE AT
WWW.BURREPLACEMENTTERMINAL.COM
DEDICATED TO REPLACEMENT TERMINAL PROCESS**

BURBANK, Calif., December 1, 2015 — The Burbank-Glendale-Pasadena Airport Authority has launched a website specifically dedicated to educating the community about the 14-gate Replacement Terminal process and objectives. The website, available at www.BURreplacementterminal.com, explains why a new terminal is needed and contains information about the ongoing Environmental Impact Report (EIR) process and potential site options for the new facilities, as well as documents presented by the Authority Commission during public meetings and workshops.

“We encourage all community members to visit the website and learn about the proposal to build a safer, modern 14-gate replacement terminal and provide lasting protections for Burbank residents,” said Airport Authority President Frank Quintero.

The central portion of the current terminal was built in 1930. Portions of the structure do not meet current earthquake design standards and, according to Federal Aviation Administration (FAA) safety guidelines, the terminal is too close to the runways and taxiways. Renovating the building will not solve the problem of its location. The relocated 14-gate Replacement Terminal would provide passengers, employees and Burbank residents with a safer, more modern Airport facility.
